3	Download and execute the file by clicking on it in the status line of the browser or in the Downloads directory. This screen will display. Click Next . 																																				

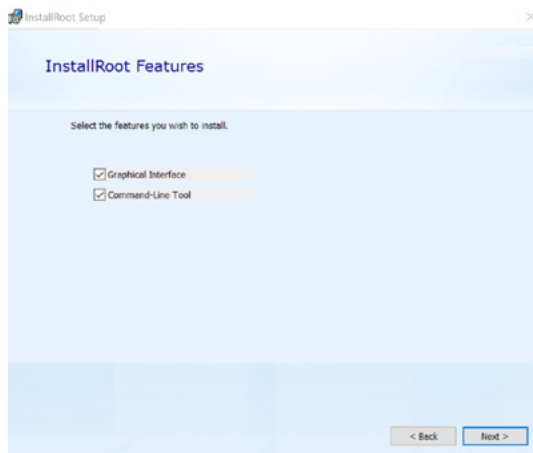

4

On the next screen, click **Next** to accept the default installation location.

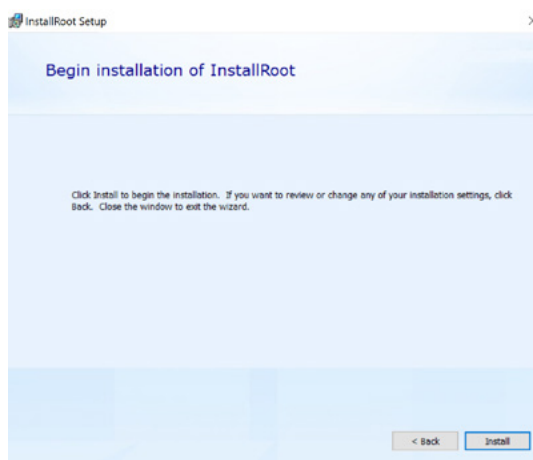

5

Click **Next** to accept the defaults.

6

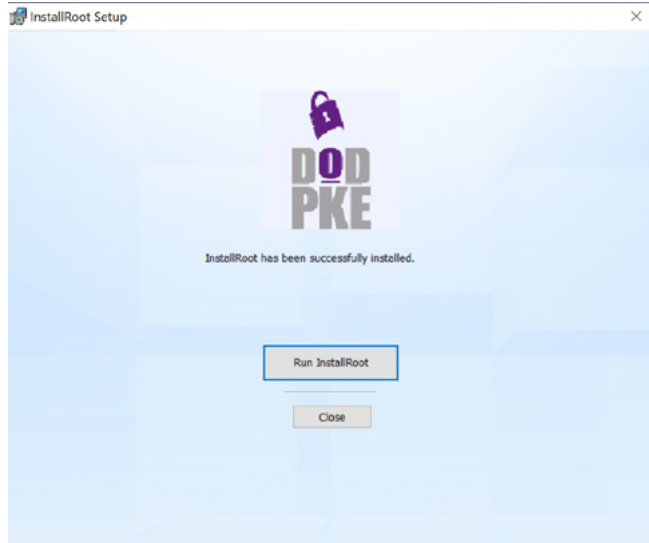

Click **Install**.

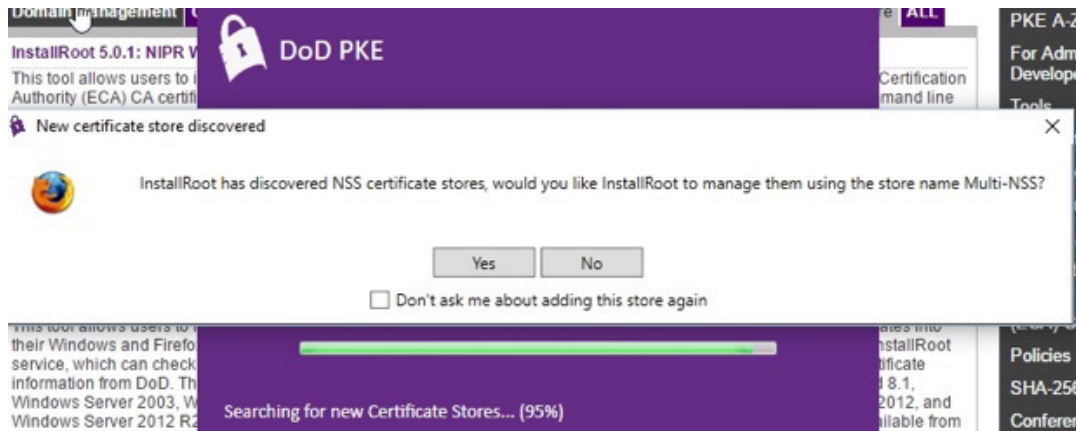

7

When this screen displays, installation is complete. Click **Run InstallRoot** to execute the program.

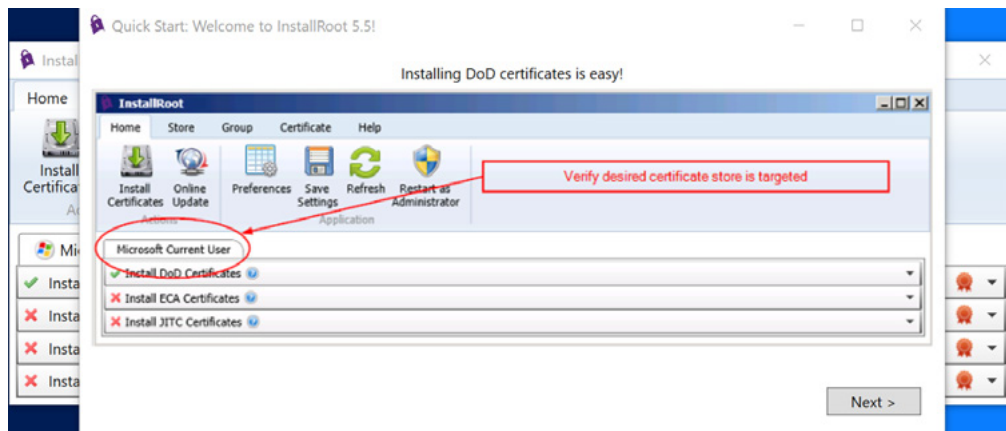

8

This screen may display if existing certificate stores are found. Click **Yes**.

9

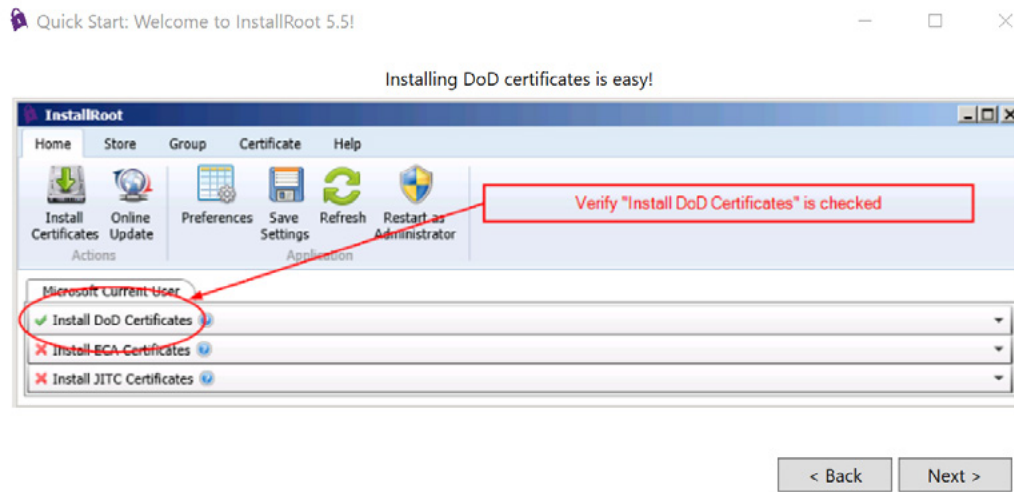

Two windows will display. Arrange them so they do not overlap. Click **Next** on the window labeled "Installing DoD certificates is easy!"

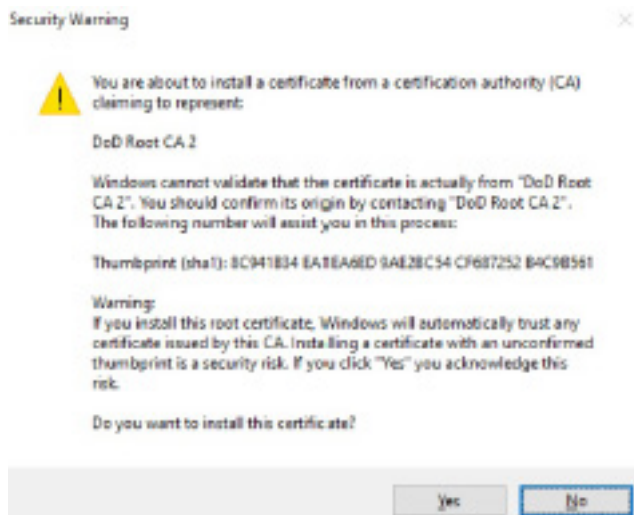

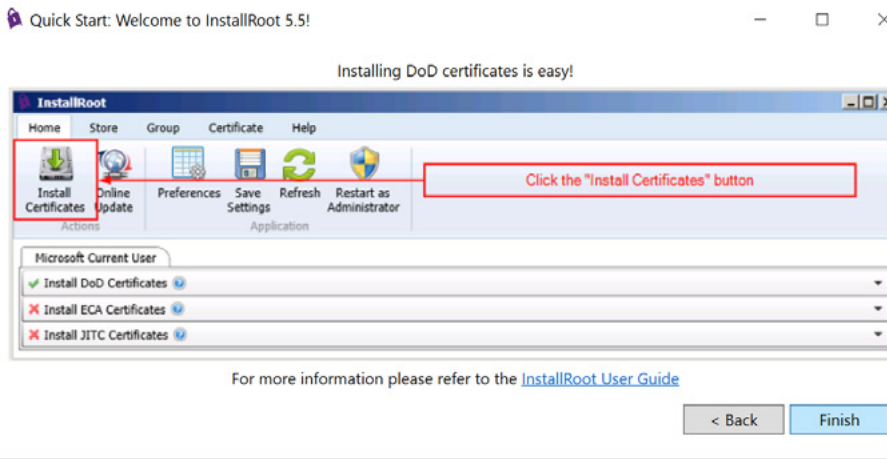

10

Click **Next** again.

11

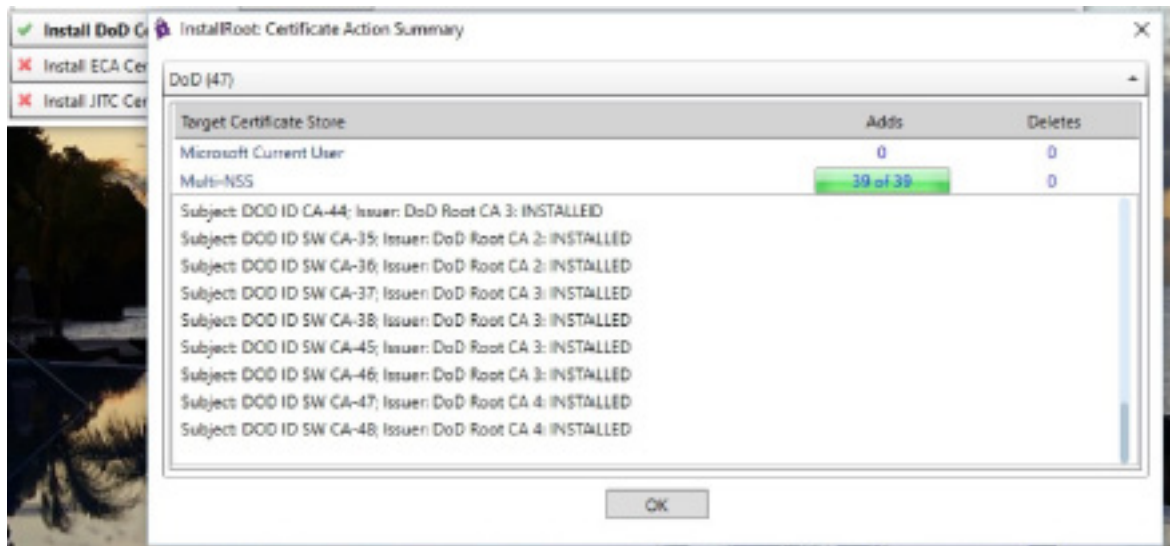

Click **Finish** in the installation window. Then click **Install Certificates** in the program window. You may see dialog boxes (Security Warning window below) asking if you want to install certificates. Click **Yes**.

12

This screen will display:

13

A listing of all installed certificates will display. Click **OK**. Click the **"X"** in the upper-right corner of the program window to close the program. A dialog panel referring to configuration changes may display. If so, choose the option desired and the program will end.
