

# Downloading, installing and running InstallRoot

Some DoD websites require installation of DoD root certificates on your computer before permitting access. Follow these instructions to install required root certificates.

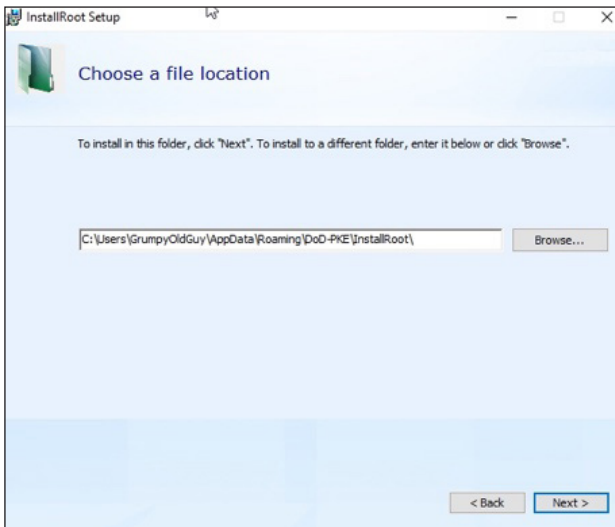

1	<p>Open a browser and type the following into the URL field: <b>iaase.disa.mil/pki-pke/Pages/tools.aspx</b> Or perform a Google search for "installroot 5.0.1 disa" and select the first entry.</p>  <p>The screenshot shows a Google search interface. The search bar contains the text "installroot 5.0.1 disa". Below the search bar, there are tabs for "All", "Shopping", "Videos", "News", "Images", "More", and "Search tools". The search results show "About 85 results (0.61 seconds)". The first result is titled "InstallRoot - IASE - Defense Information Systems Agency" and includes the URL "iaase.disa.mil/pki-pke/.../tools.html".</p>
2	<p>On the page that displays, select the Trust Store tab (red arrow below) to display the InstallRoot page. Click Non Administrator (green arrow) to download the program.</p>  <p>The screenshot shows the IASE website's "PKI and PKE Tools" page. The page has a navigation menu with tabs for "Domain Management", "Certificate Tools", "Certificate Validation", "Email", "Middleware", "Mobile Devices", "Trust Store", and "ALL". A red arrow points to the "Trust Store" tab. Below the tabs, there is a section titled "InstallRoot 5.0.1: NIPR Windows Installer" with a list of options: "32-bit Installer", "64-bit Installer", and "Non Administrator". A green arrow points to the "Non Administrator" option. A sidebar on the right contains links for "PKI-PKE Home", "Getting Started", "End Users", "PKE A-Z", "For Administrators, Developers", "Tools", "SIPRNet PKI", "Mobile Devices", "Interoperability", "For RAs, LRAs, KRAs", and "Newsletters".</p>

3

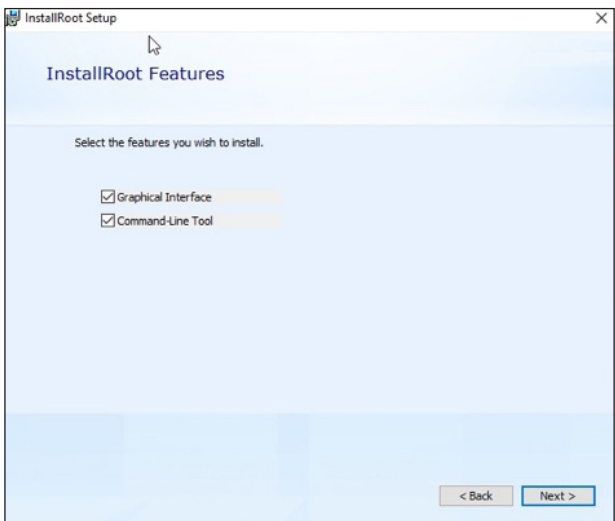

Download and execute the file by clicking on it in the status line of the browser or in the Downloads directory. This screen will display. Click Next.

4

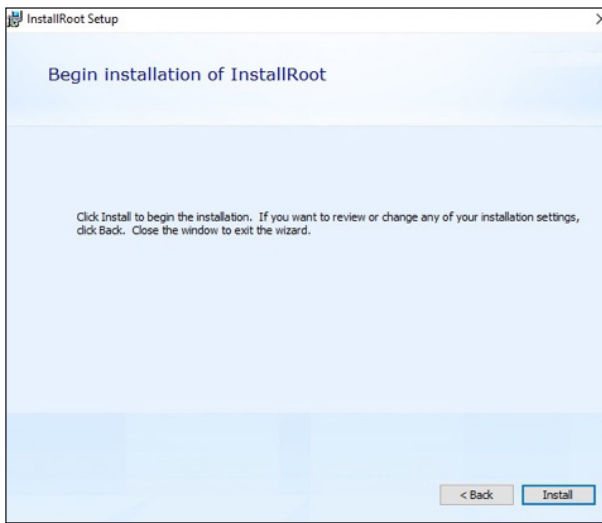

On the next screen, click Next to accept the default installation location.

5

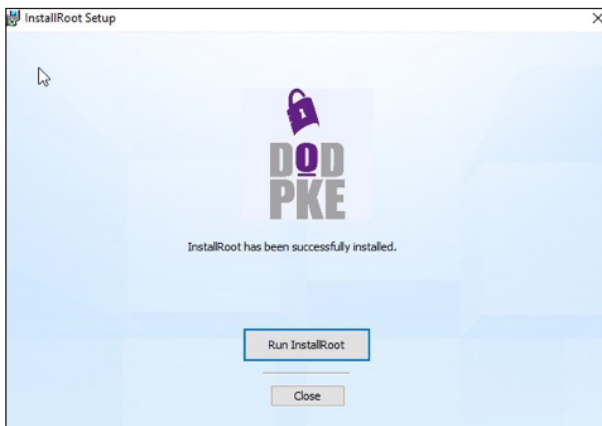

Click Next to accept the defaults.

6

Click Install.

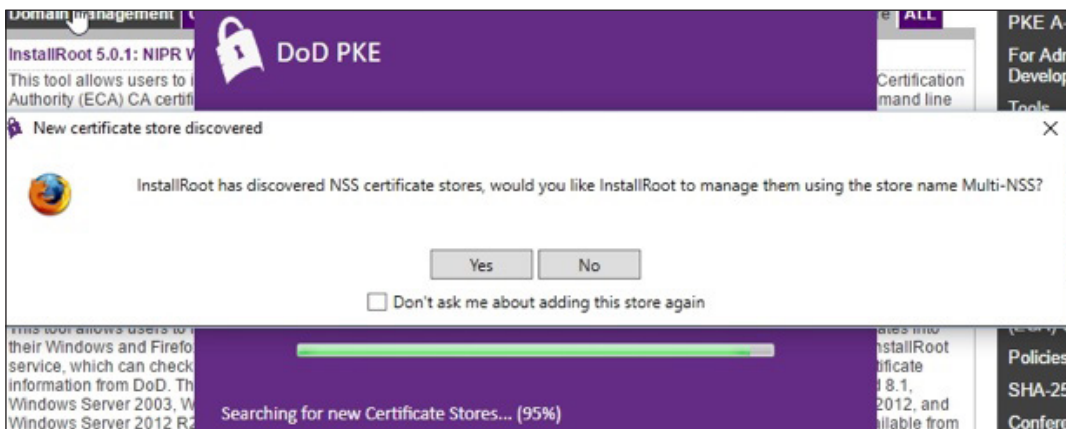

7

When this screen displays, installation is complete. Click Run InstallRoot to execute the program.

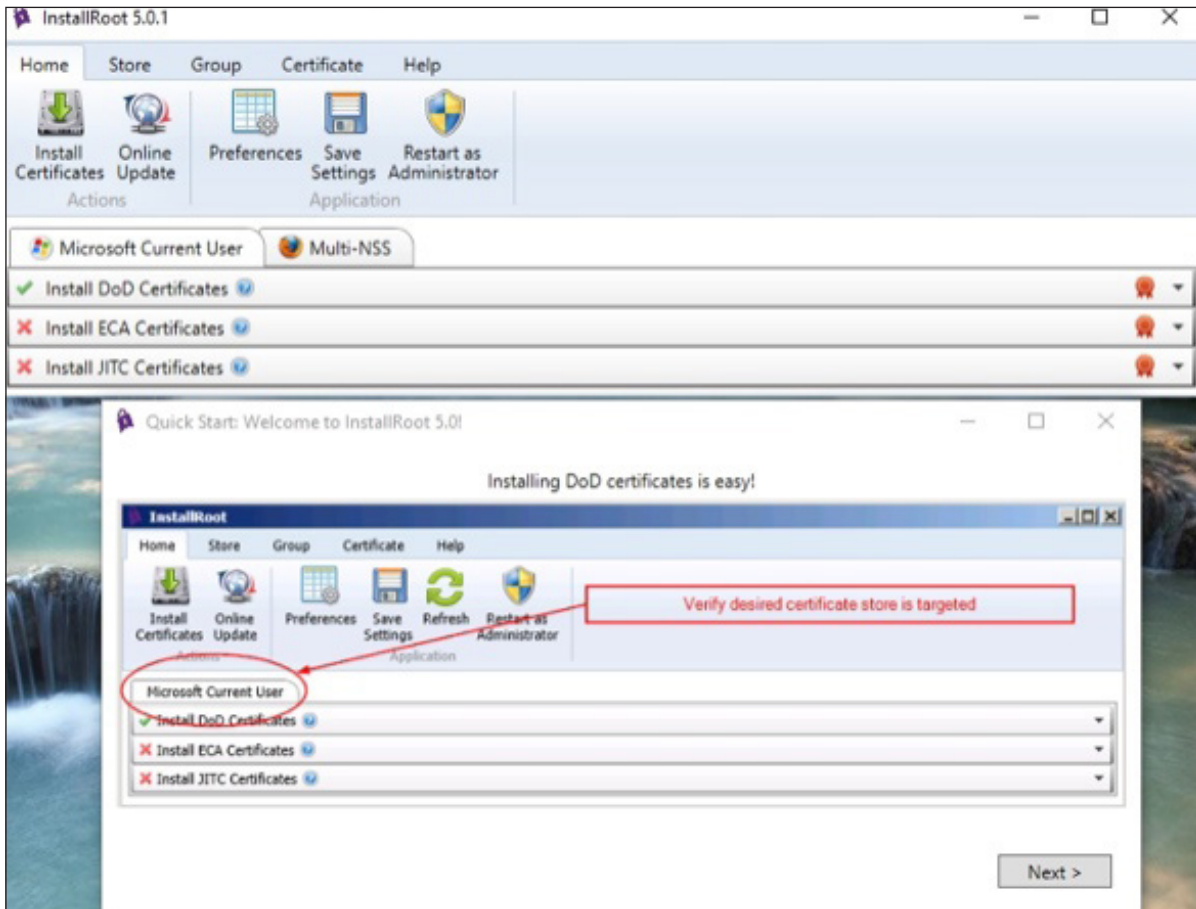

8

This screen may display if existing certificate stores are found. Click Yes.

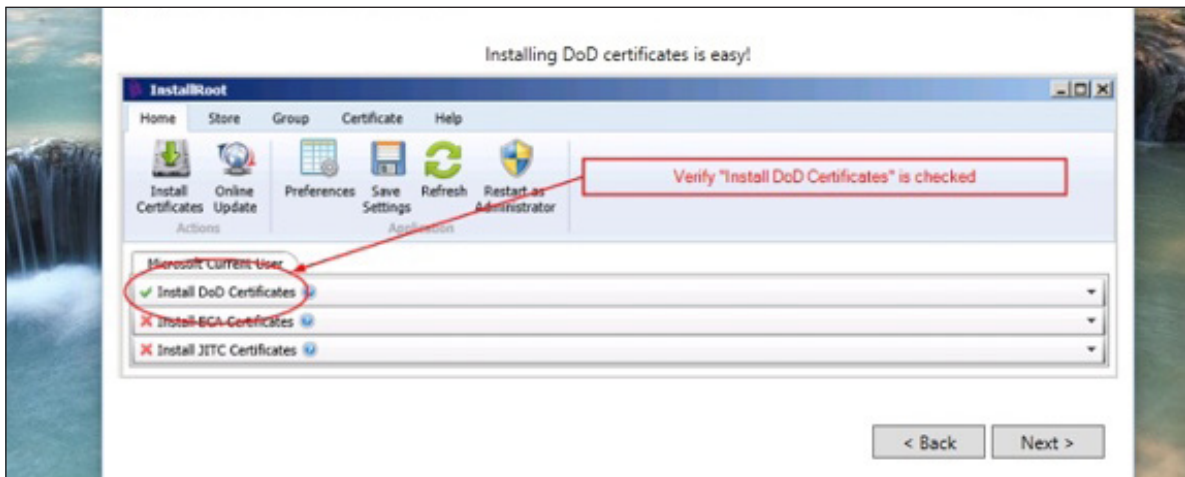

Two windows will display. Arrange them so they do not overlap. Click Next on the window labeled "Installing DoD certificates is easy!"

9

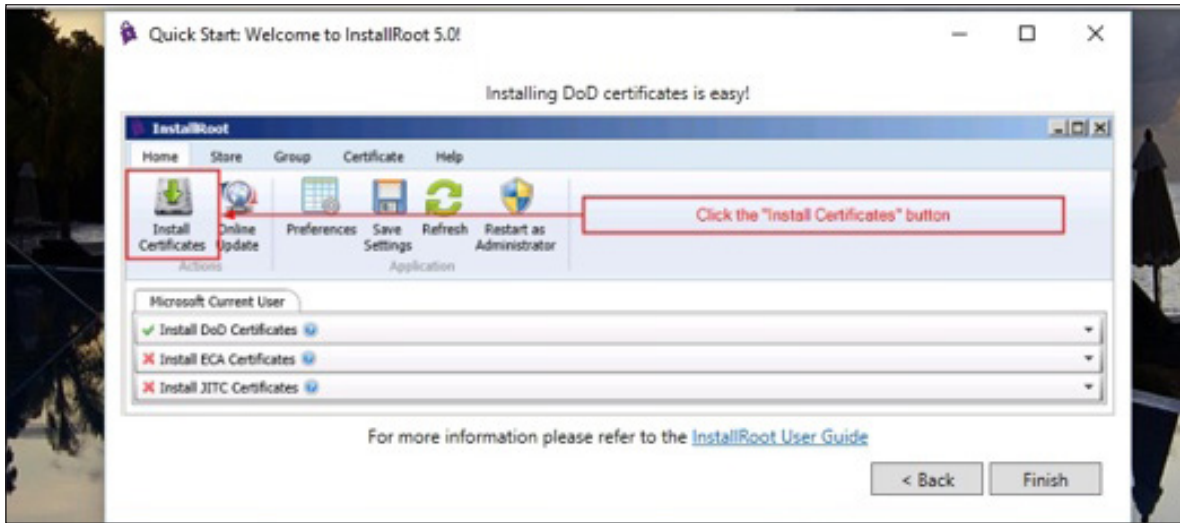

Click Next again.

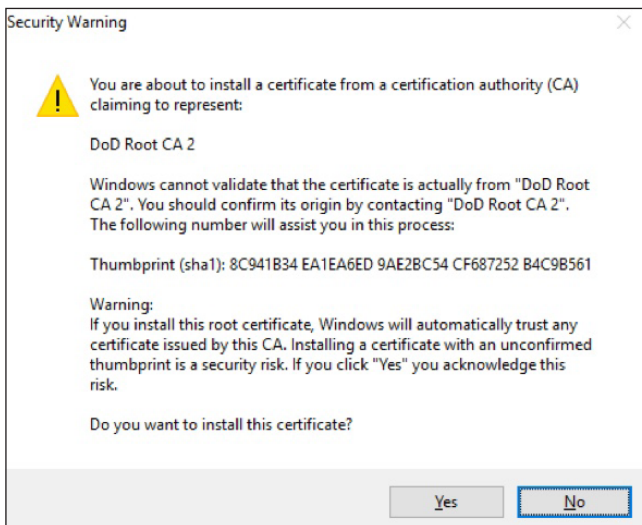

10

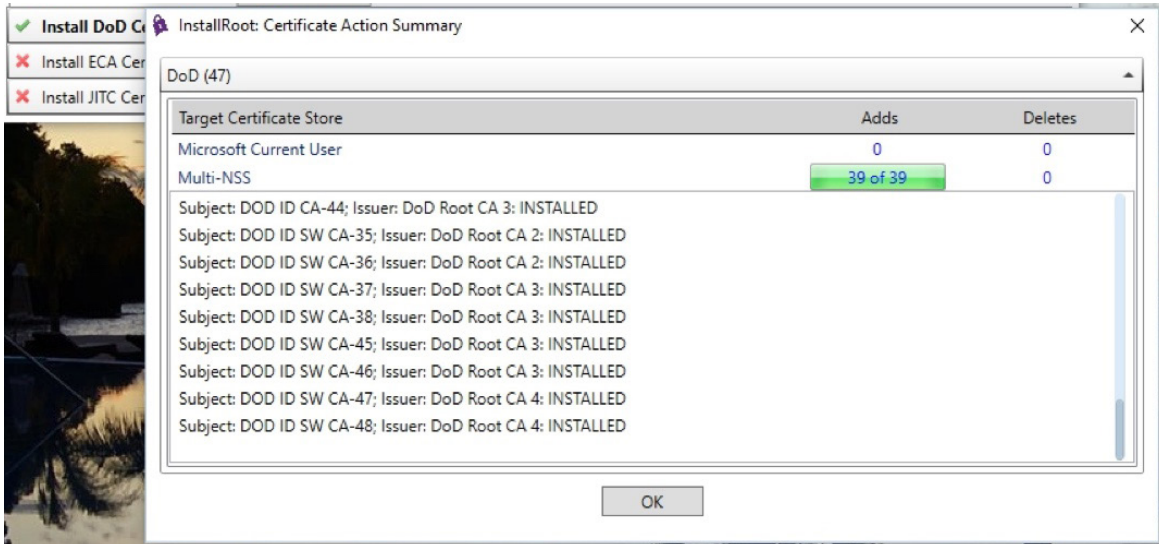

Click Finish in the installation window. Then click Install Certificates in the program window. You may see dialog boxes (Security Warning window below) asking if you want to install certificates. Click Yes.

11

This screen will display:

12

13 A listing of all installed certificates will display. Click OK. Click the "X" in the upper-right corner of the program window to close the program. A dialog panel referring to configuration changes may display. If so, choose the option desired and the program will end.
